**ABB  
Manufacturing  
& Resource  
Efficiency Award**

Sponsored by

# Manufacturing and Resource Efficiency

## **Purpose**

The Award is to recognize the company or individual operating unit that can demonstrate world-class manufacturing performance or the most successful improvement to its manufacturing performance involving demonstrable excellence and/or significant improvements to resource efficiency (raw materials, energy, water, utilities etc) within the manufacturing process.

**There is one Award category** to cover the full scope of manufacturing processes; both batch/specialized product manufacture and continuous/high volume manufacture. Success in the award will be based on evidence of an organization that has developed or is developing its people and systems towards achieving excellent manufacturing & resource efficiency performance, and benefiting customers in terms of quality, cost and delivery achievement.

## **Stage One**

A panel of judges will review the answers to the entry form questionnaire and other supporting information supplied, and select a short-list. Short listed companies will be notified by 10 April 2017

## **Stage Two**

Short-listed entrants will receive a site visit by the Sponsor and a CIA staff member, who will review the manufacturing process. Each visit will last approx ½ day and companies will be expected to provide a site tour and a presentation on their nomination. The visits will be arranged in early May. Additional supporting information may be requested before any site visit is arranged.

## **Stage Three**

The judging panel will then reconvene to select the winners.

# Contact Information

Name of Company:

Address of Company/  
Site entering the  
Award

Contact Name  
(please include  
title, first name and  
surname)

Position:

Contact Address  
(if different to above):
